MODEL S4s

TECHNICAL SPECIFICATIONS

Designed for On-wall or flushed in (2pi) applications. Perhaps our most versatile speaker. Can be used as surround, height or LCR. When used as a surround channel the S4s has uncommonly high sensitivity, power handling and low distortion making this the ideal choice for high end theaters. Featuring our proprietary DPC-Array controlling Mid/High frequencies, centered by our finest 28mm Beryllium dome and dual 28mm TPCD ultra-lightweight domes. This new tweeter/waveguide DPC-Array delivers amazing accuracy, smoothness, and directivity control to handle the critical vocal range and delicate treble. The S4s shares the same DPC-Array and benefits from our unique timbre matching technique as found in the entire S-Series range of speakers. Unparalleled dynamic range, low distortion and musical finesse. The Perlisten S4s continues the lineup of speakers that have the distinguished honor to be the world's first and only loudspeakers to be certified for THX Dominus - their highest rating.
